PROVIDING A COMPLETE PIPEWORK SERVICE TO EAST ANGLIA

AT HYDRATECH WE OFFER A COMPLETE PIPEWORK SERVICE, INCLUDING FULL MECHANICAL PIPEWORK ENGINEERING. WE ALSO PROVIDE PIPEWORK SERVICES AND STEELWORK INSTALLATIONS TO ENERGY, PROCESS AND MANUFACTURING COMPANIES.

Hydratech Pipework Services is a fully integrated service, delivered by a team of specialist pipework contractors. We provide full mechanical pipework engineering services along with pipework services and steelwork installations to energy, process and manufacturing companies throughout East Anglia.

Our service

We provide our clients with everything from full turnkey new systems to maintenance and repairs of current systems, with focused planning to limit factory downtime.

Our fully integrated service includes:

- **Design**
Off-site fabrication and on-site fabrication (all welders certified and coded to BS-EN)
- **Supply, installation and testing**
Provision of skilled staff for shutdowns, maintenance and repairs.

As part of our fully integrated service we can provide pipework supply, installation and testing of the following:

- **Stainless Steel Welded** – All Grades (schedule, metric and ISO thin wall, hygienic food types and pharmaceutical)
- **Stainless Steel Socket Weld** (screwed and compression)
- **Carbon Steel** (welded, socketed, screwed and grooved)
- **Galvanised/Plated Steel** (flanged sections and screwed)
- **Thermoplastic & Thermosetting plastic piping systems** (butt, socketed, electro fusion and solvent cement systems)
- **Copper** (soldered, press fit and compression)
- **ABS** (solvent welded)
- **PVC-U** (solvent welded)

Who we work for

We have vast experience working for clients in the following sectors:

- **Pharmaceutical plants**
- **Food processing and sugar factories**
- **Oil and gas terminals**
- **Anaerobic digestion and bio-gas plants**
- **Brewery's and beverage factories**
- **Concrete manufacturing plants**
- **Paper mills**
- **Power stations**
- **Water treatment and sewage works**
- **Other general manufacturing plants**

We undertake stainless steel pipework installations (including high grade stainless steel dairy pipework installations), carbon steel, copper, plastic, aluminium and titanium pipework installations, for all applications including the transportation of raw materials, finished products, gas and bio gas lines, compressed air and gas lines, oil lines, steam and all water services. Covering all energy, manufacturing and process pipework needs.

Our team

We provide all services from large site based supervised teams of welders and pipefitters to manage your on-going pipework maintenance and project needs right down to supply of fabricated sections.

Our team of contractors consists of fully trained and experienced engineers, supervisors, coded welders, advanced fitters, platters, mates and apprentices.

Our commitment

Our specific aim on all projects is provide a comprehensive management and planning service, insuring that the project runs smoothly from the initial brief through to completion, whilst maintaining our high standards of health and safety, quality and environmental concerns. Helping us to establish and maintain mutually beneficial long-term relationships with both our customers and suppliers.
