# Rexroth Bosch Group

Hydratech Engineering is a distributor for Bosch Rexroth for the East Anglia area and provides high quality hydraulic engineering solutions to a wide variety of manufacturing industries.

As a Bosch Rexroth distributor we stock a comprehensive range of common components and our staff are trained to provide help with design, engineering and application. Customers can choose to take delivery in component, kit or fully assembled forms.

## Local availability, global support

**World class Rexroth components from your local supplier:**

### Industrial Hydraulic Valves:

- Supply of the complete range of Rexroth industrial valves
- Cetop 3 up to Cetop 9 interface, direct & pilot operated directional valves
- Sandwich valves for stack assembly
- Pressure relief & reducing valves
- Check & flow control technology
- Cartridge valve technology from Bosch Rexroth Oil Control division

### Pumps/Motors:

- External and internal gear technology
- Vane pumps
- Radial pumps & motor
- Axial piston pumps and motors (fixed & variable)

### Cylinders:

- Tie rod cylinders including CDT3 ISO cylinder range
- Mill type (welded) cylinder range up to 350 bar
- Servo cylinder technology
- Specialised cylinders for applications including marine, pressure intensification, power generation etc.

### Proportional & Servo Technology:

- Directional control
- Pressure control
- Flow control
- Multi-axis control
- Integrated electronic technology

### Genuine Spares:

Access to genuine Rexroth spares guaranteeing the quality of the product.

### Repair:

- Repairs carried out by Bosch Rexroth with warranties using only genuine Bosch Rexroth spares.
- Supported locally from regional centres, nationally from the centre of competence at St. Neots and worldwide in over 80 countries.

### Service:

- Experienced service engineers to support you on site both in the UK and abroad.
- Service agreements for regular plant health checks
